KOMPERDELL

KOMPERDELL

PIONEER AWARD WINNER MARKET LEADER

THE PIONEER

For more than 20 years we have been collaborating with the leading brands of the motorcycle industry – undoubtedly the most extreme application field when it comes to impact protection. We are and will always remain dedicated to developing protectors that offer the best impact protection and comfort!

AWARD WINNER

No other brand has won more comparative tests than we did. For years, our products have been the benchmark for safety in the motorcycle, wintersports, equestrian and bike industry. Not only have our protectors been honored with multiple awards year over year – we are proud to have already won the **Spoga Horse Innovation Award three times.**

MARKET LEADER

Both the protective foam and the construction of the protector itself are unique to our protectors and are proprietary Komperdell technologies. We are the only brand to develop and manufacture not only the garment but the protector itself. This unique combination allows us to develop the protector and the garment as one cohesive unit. This makes our protectors so much better to wear without sacrificing their protective properties.

“Different, but with a purpose.
We develop and design with a deep commitment for creating value for the consumer and a passion for excellence. For us, „ good“ is by far not good enough.”

Thomas Roiser, CEO KOMPERDELL

WE ARE THE N° 1

We are always searching for the best solution, simply because we want the best for our customers.
That's probably why poles and protection from Komperdell have already won numerous innovation and technology awards.

WE DO IT OUR WAY

We have no room for bells and whistles.
That's why our products often appear puristic compared to competitors. We give up unfunctional details and decorative ballast in order to let the purpose determine the design.
Not everyone likes it, but our success proves us right:
Komperdell is the first choice for more than 200 athletes and one of the most successful brands in history.

By the way - we create 100 % of our products in the heart of Austria. With a lot of passion, heart and soul.

WHY A **KOMPERDELL** PROTECTOR

Nº 1 PROTECTION

HIGHEST SAFETY

All Komperdell protectors are multi-impact capable and can be reused after a fall if they are not physically damaged. Our proprietary impact foam has the highest energy absorption properties on the market.

LIGHT AND FLEXIBLE

Our protector is incredibly light and super flexible. Our customers rave about the comfort we offer compared to other brands on the market.

PERFECT FIT FOR EVERYONE

We develop both the protective technology and the garment. That's why we can match them up perfectly to offer protective vests that are hardly noticeable when worn without compromising their protective properties.

MAXIMUM FREEDOM OF MOVEMENT

We work extremely diligent and constantly push us to get better and better. A dedication you will feel as soon as you put on our vests. Our goal is to protect our riders and strive to hinder their freedom of movement as little as possible.

WASHABLE

Every Komperdell protector can be washed at 30°. Even after multiple washes, the residual force values remain the same.

WE KNOW HOW

No other brand has had such a profound impact on the the market for protective garments as Komperdell. Our Know-How is based on more than 25 years of experience in developing protective garments for motorcycling, skiing, biking and riding. We pride ourselves in being true pioneers and technology leaders. More than 30 international awards have been won for our protective wear.

My first choice.

As an experienced rider, I really enjoy developing our equestrian protectors because it allows me to combine my passion and my profession."

Klara Lindner, Design & Development

EQUESTRIAN

The most common injuries are caused by horse kicks or rotational falls, where the horse might land on the rider. With a Komperdell protector you do not have to separate from the horse for the protector to work and our unique construction and protective foam can absorb up to 93 % of the impact in case of a fall or crash.

3 TYPES OF PROTECTORS FOR MAXIMUM SAFETY IN EQUITATION

Automatic
width adjustment
without loss of protection

1 SAFETY VEST FRONTZIP EN 13158:2018 - LEVEL 3

Our safest equestrian protector with 360° protection and EN 13158:2018 - Level 3 certification. The ergonomic cut and the especially soft, flexible protector body ensure maximum comfort with best protection values. Perfect for cross-country riding and approved for eventing.

Automatic
width adjustment
without loss of protection

2 BALLISTIC FLEX FIT EN 1621-2 - LEVEL 2

In addition to the multi-layered back protector, the vest offers protection zones in the front and rib areas and is therefore the ideal protector for daily training. The automatic width adjustment ensures almost complete all-round protection with the best wearing comfort, as the vest automatically adapts to the rider's shape.

3 CASUAL PROTECTION EN 1621-2 - LEVEL 2

The casual line is the perfect alternative for daily training and work with the horse, as the protector is integrated directly into the garment, eliminating one layer of functional clothing. Absolute lightness and breathability guaranteed!

SAFETY VEST LEVEL 3

EN 13158:2018

360° perfect safety with our level 3 vest.

Our safety vest providing 360° protection is amazingly comfortable. Due to its special ergonomic cut it perfectly contours to your individual body shape. The multi-layer construction and the especially soft foam guarantees a perfectly ergonomic fit.

approved by
EN 13158:2018 – Level 3

With top results for residual forces our vest surpasses the strictest legal standards – 360° perfect safety.
